

My name is George Francis Chowallur, Exe. Director of Jibu & Thomas Projects Pvt Ltd, a construction management company. It is a Sister concern of Jibu & Thomas, Architects located at Panampilly Nagar who were having innumerable problems with the external and internal communication processes. Although a free software was got installed through a professional agency to overcome this problem, the process could not take off due to resistance from the employees apprehending additional workload and accountability. I mentioned this situation to Mr. Krishnanath Venkataraman of Caparizon Software Pvt Ltd during a BNI meeting of Diamonds, Cochin chapter and he responded immediately by coming over to my office and understanding all issues involved. He suggested a workshop of 2 hours duration and on 13th April 2018, he was able to convince all the employees about the requirement of utilization of such a communication software in the office of which the benefits shall accrue to the organization as well as all employees for internal and external communication. As a result of this, the mental block was removed and the process started in an effective manner. I would strongly recommend Mr. Krishnanath Venkataraman for installation of any software or ERP in any institution, office or business establishment.

George Francis
