YOUR TRAVEL ERP SOLUTION

What is Tramiz?

Tramiz is a total software suite for IATA travel agencies and travel business organizations. It automates their end-to-end business activities and helps them streamline and integrate different functions. Various reports both routine as well as on-demand and exception reports help top management to have a feel of the organization's health at any instant, enabling them to take strategic decisions.

How is Tramiz beneficial?

With technology booming every second the presence of a software has become essential in every industry. Travel agencies also need an efficient solution for managing all their activities. This is where Tramiz benefits the business. It contains the right features and functionality to make the business more streamlined and this gives the top management ample time to enhance their business.

Cloud Hosting

Tramiz being cloud-based, can be accessed from any place with an Internet connection and computer. Therefore, business is always within the reach.

Accounts Management

The software is equipped with all the essential features in the Indian Accounting. From invoicing to reconciliation and generating statutory reports, we have it all covered. Our software is designed with utmost flexibility so that the management receives all the reports in Excel and PDF.

Net Margin Report

Net Margin Report Analysis is an analysis to obtain the details of profit earned per ticket. This report contains the details of an invoice such as invoice number, passenger, customer, vendor, airline details, ticket fare break up in the customer and supplier invoices, balance and profit. This report will also help in understanding the maximum and minimum profit generating clients and airlines.

Ticket Booking

Managing information of every ticket booking by entering the data into a software is laborious and non-efficient. Tramiz eliminates this and will save a lot of time by automatically fetching the booking information from the AIR and MIR files.

GST Ready

India joins with many nations to implement GST in every sector and we are aware of the effect of GST on travel business. Therefore, Tramiz is GST ready and will automatically calculate GST based on the invoice value.
